

# Internally Wired Suspension Bars

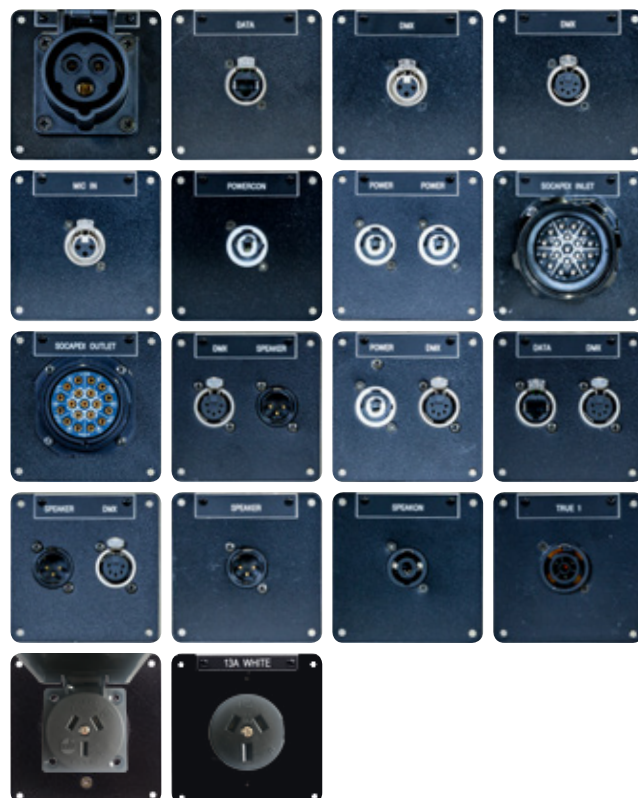

CUSTOM MADE, PROFESSIONAL GRADE PRODUCT

Designed to meet the demanding needs of live entertainment SHOWTECHNIX produce a range of suspension bars that are suitable for professional lighting, audio and data infrastructure. Primarily used for permanent installation they can be used in touring too.

Made from high quality aluminium tubing, fitted with powder coated black steel outlet boxes, the internally wired suspension bars are custom made to meet your exact requirements. Length, number of outlets and type of outlets are bespoke to meet your venues needs.

The final suspension bars are thoroughly tested prior to shipment to ensure quality and electrical safety. Bars are typically made to be folded at 3M in length for ease of transport and supplied complete with sleeves to make them rigid onsite, ready for installation.

Suspension bars are available in a wide range of options. Choose from 15 and 16 Amp, 10A Connectors, PowerCON, TrueCON for power and XLR & RJ45 for DMX, data and audio signals. Suspension bars are available in a wide range of custom paint colours to blend in with architectural designs and are also available curved, to match the shape of a building or circle balcony front.
