

HDMI DA 1:4 Rack Module

Theatrical

#XVVRM-HDMIDA

The HDMI DA 1:4 Rack Module is a unit option for the 8-Bay Reversible Rackmount Converter system. The module can be inserted in the 8-Bay Frame in either direction, allowing the inputs/outputs to be positioned either at the front or the back of the unit depending on the application. There are no exposed PCBs as all modules are enclosed, and therefore protected against static shock, dust and general wear and tear. Gold-plated, redundant spring pins with magnetic retention deliver DC power to the modules, meaning no messy cabling and external power bricks are needed.

Connections

Video Input

HDMI 2.0 type A with lock system

Video Output

4 x HDMI 2.0 type A with lock system
Individual downscaling per port

Supported Signals

Format Support

HDR 4K/2K @ 60 fps (4:2:0 10 bits)
4K/2K @ 60 fps (4:4:4 8 bits)

Physical

HDCP Compliance

HDCP 2.2/1.4

Video Bandwidth

Single-link 600 MHz (18 Gbps)

Embedded Audio Support

DTS-HD Master Audio, Dolby TrueHD Dolby Digital, DTS, LPCM

Height

121.5 mm (4.78 in)

Depth

225 mm (8.85 in)

Width

41 mm (1.61 in)

Weight

710 g (1.56 lbs)

Operating Temperature

0-40° C

Relative Humidity

0 -90 % non-condensing

Power Supply

Reversible redundant power fed by TXVV-RF8 (8-Bay)

Rackmount Frame)

Power Consumption

20 W

**Operational Voltage
Range**

12 VDC
