Custom Gobos

Rosco has long been involved in the production of gobos, catalogue and custom, metal and glass, monochrome and colour. The acquisition of DHA Lighting in 2005 added a new dimension, creating a world leader in experience and expertise. Rosco has built upon these foundations, bringing in leading authority staff, enlarging in-house manufacturing facilities and expanding product processes. All part of a commitment to constant product and process improvement.

The inherent "bespoke" nature of custom gobos mean that you, as the customer, require more than just a premium product, but also excellence in service. At DHA:Rosco we have an integrated team with direct communications between all aspects of service: order processing, graphics, manufacturing and despatch. Working together to ensure you get best advice, best product and best delivery. Only DHA:Rosco gives you access to this team, providing you with:

- Unrivalled expertise and advice
- A dedicated graphics team
- Rapid proofing
- Flexible manufacturing processes
- Rapid turnaround

Our resources are dedicated to making sure you get the best.

See page 61 for details on specifying custom gobos.

Choosing Standard Gobo Designs Online

Many designers prefer to choose their gobos online. Rosco's new Gobo Website makes it easier and faster.

All the gobos in this catalogue are shown on the site. You can choose by categories, as in this catalogue, or search by name or number. You can also enlarge or reduce the illustrated designs.

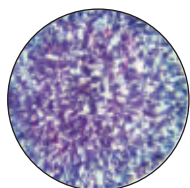

Rosco's Gobo Website is at:
<http://www.rosco.com/gobos>

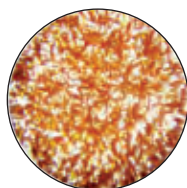

Colorizers™

Rosco's Colorizers™ can be used to create beautiful multi-coloured projection effects. Coloured in gentle hues, in one of three styles — stippled, featherlight, or free flow — Colorizers™ can be used alone or combined with a steel pattern for a more dramatic effect. Designs marked with an asterisk * are available in X Size for use in the Rosco X-Effects Projector.

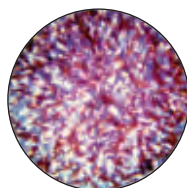

Stippled Series

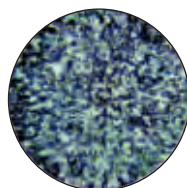

55004*
Blue and Lavender

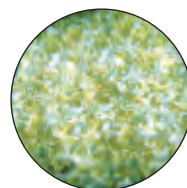

55005*
Amber and Red

55006*
Red, Blue and Lavender

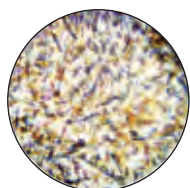

55007*
Green, Blue and Lavender

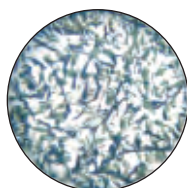

55008*
Green and Yellow

Featherlight Series

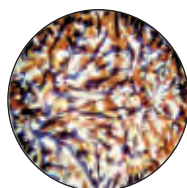

Similar to the Stippled Colorizers, but with a less dense "feather duster" pattern to allow more white light through.

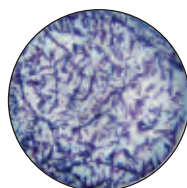

56201
Blue, Lavender and Yellow

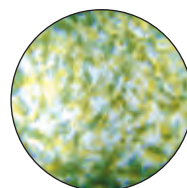

56202
Blue and Green

56203
Red, Lavender and Yellow

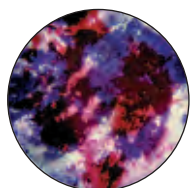

56204
Blue and Lavender

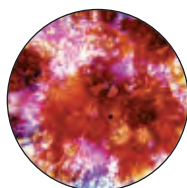

56205
Green and Yellow

Free Flow Series

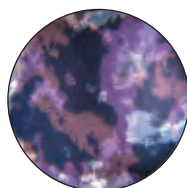

A combination of colours smoothly blended together in a unique, flowing design.

56101*
Cool: Blues, Reds
and Lavenders

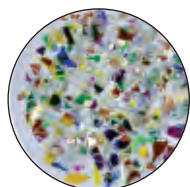

56102*
Warm: Red, Ambers,
Blues and Lavenders

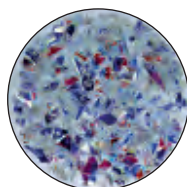

56103*
Midnight: Blues,
Lavenders and Greens

Prismatics™

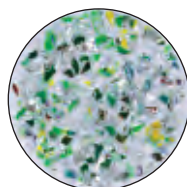

Prismatics™ are recommended for use in moving lights with lamps up to 1200 watts. In ellipsoidal fixtures, they should be used with a 600 watt lamp, though short term use with lamps up to 750 watts may be acceptable. Prismatics™ require the use of the Universal Iris Slot Holder. Prismatics™ are available in standard B Size – smaller sizes are available by special order. As the pattern does not scale, use in very small sizes is not advised. Prismatics™ are NOT available for use in the Rosco X-Effects Projector.

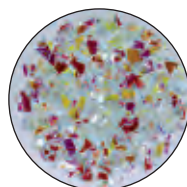

43801
Kaleidoscope

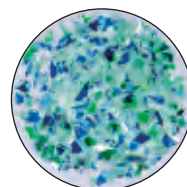

43802
Cool Lavender

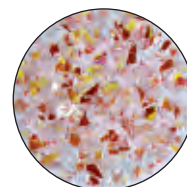

43803
Spring Greens

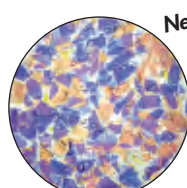

No. 43804
Sunset

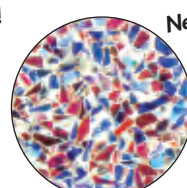

43805
Blue Water

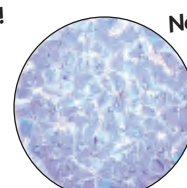

43806
Fiery Sun

43807
Warm Contrast

43808
Patriotic

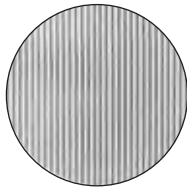

43809
Crystalline

Image Glass™

Rosco's Image Glass™ is deeply textured glass that refracts and bends light into intricate patterns of light and grayscale images. Altering the sharp focus of the fixture transforms the image into subtle and complex textured shadows. Image Glass™ is available in standard B Size or in smaller sizes by special order. As the pattern does not scale, use in very small sizes is not advised. Designs marked with an asterisk * are available in X Size for use in the Rosco X-Effects Projector.

33600*
Flower

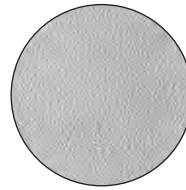

33601*
Lined

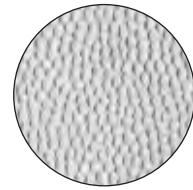

33602
Plume

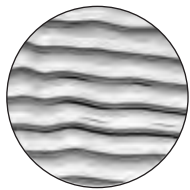

33603
Lt. Plume

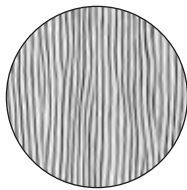

33604

33620*
Ice

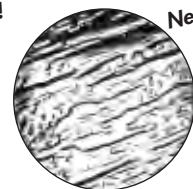

33621*
Dune

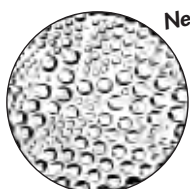

33622*
Sparkelite

33623
Reflections

33624
Rain Glass

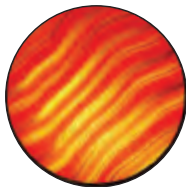

33625
Foam Bubbles

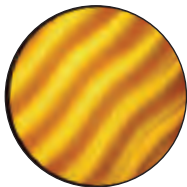

ColorWaves™

Rosco's ColorWaves™ are a new idea in glass gobos to help create vibrant coloured textures and shapes. Each glass texture – Waves, Sparkelite, Strands, Ripple or Mosaic – is coated in one of five brilliant dichroic colours. The projection is a remarkable and unique combination of colour, texture, shading and blending. ColorWaves™ are available in standard B Size or in smaller sizes by special order. As the pattern does not scale, use in very small sizes is not advised. Designs marked with an asterisk * are available in X Size for use in the Rosco X-Effects Projector.

Tips Building A Full Stage Gobo Wash

To wash the large areas of stage or scenery with foliage breakups, choose a breakup design that has interlocking or uneven edges, not an obvious circular perimeter. When you combine the projections from several fixtures, the shadows blend together with few noticeable "seams."

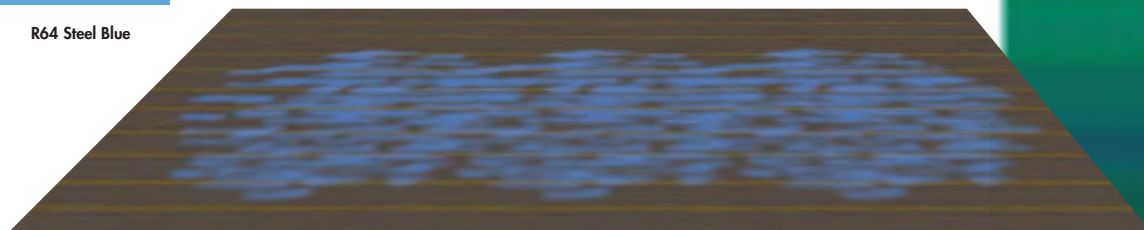

Ken Billington's Interlocking Breakup design perfectly illustrates this technique.

Tips

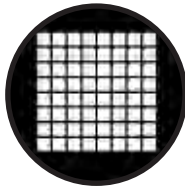

Add Depth By Combining Steel and Glass Gobos

A steel gobo creates a flat, two-dimensional image. Many projections are improved when the illusion of depth is achieved. Try adding a layer of Image Glass in with your steel gobo to enhance the look of your scene.

Tips Build Your Own Projection

The Rosco library contains literally thousands of images from which to choose the perfect design—and still sometimes you can't find just the right image. Try sandwiching two designs together to create one new gobo design.

77703 Double Hung Window

79119 Winter Tree 2

Layer steel gobo #79119 behind steel gobo #77703 to project a perfect haunted scene.

Gobo Sizes

Rosco offers the entire range of steel and glass gobos in sizes to fit most modern luminaires. In addition to these standard sizes, Rosco will manufacture any gobo into non-standard sizes (barring technical constraints) and make them available at the standard price. Contact Rosco for details and lead times.

Generic Gobo Sizes	OD	IA
A	100mm	75mm
B	86mm	64.5mm
M	66mm	49.5mm
D (metal)	53.3mm	40mm
D (glass)	51.8mm	40mm
E	37.5mm	28.1mm

This is just a small selection of gobos sizes available. For specific requirements feel free to contact our Customer Service Team.

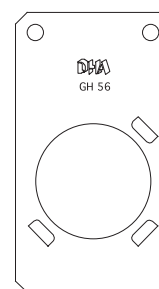

Specific Gobo Sizes	OD	IA
Martin		
Mania	53.3mm	40mm
Mac 250	22.5mm	17mm
Mac 500/700	27.8mm	23mm
Mac2000	37.5mm	30mm
Vari-Lite*		
VL1000	36.3mm	25mm
VL2000(rotating)	22.5mm	17mm
VL3000	37.5mm	28mm

* All Vari-lite luminaires require specific gobo carriers

Robe		
Colourspot 150/250/575	26.9mm	22.5mm
Colourspot 1200	37.5mm	28.1mm

Clay Paky		
Alphaspot 1200 (fixed)	31.5mm	25mm
Alphaspot 1200 (Rotate)	37.5mm	25mm
Goldenscan	66mm	45mm
VIP 150/300 (metal)	53.3mm	45mm
VIP150/300 (glass)	51.8mm	40mm
VIP1200 (metal)	66mm	49.5mm
VIP1200 (glass)*	51.8mm	40mm

* Adaptor required

DHA Style
Gobo Holder

Gobo Holders

With the breadth and depth of gobos available, it is important to choose the gobo holder that is appropriate for your luminaire (most luminaires must use a specific size gobo) and for the type of gobo you are using. Some gobos are thicker than others and require a special holder to accommodate it.

DHA:Rosco manufactures gobo holders to fit most luminaires in current use. When selecting a gobo holder, care must be taken to ensure that both the overall dimensions of the holder and the size of the gobo it will accept, are compatible with the lantern used.

Note: unless otherwise specified, all DHA:Rosco 'A' & 'B' size glass gobos are made with 70mm glass, bezzled to its overall diameter.

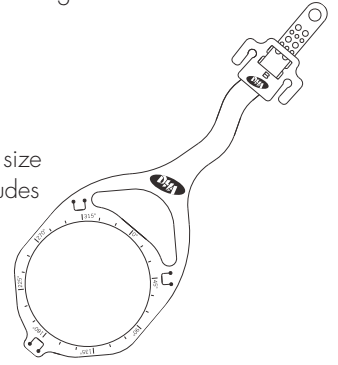

This is just a small selection of luminaires. For those that are not listed please contact one of our Customer Service Team.

Gobo Adaptors

To allow more versatility of use for B and M size gobos, we have developed the gobo adaptor. Etched from the same stainless steel as a standard gobo, this simple device allows an M size gobo to be used in a B size gobo holder and a B size gobo to be used in an A size gobo holder.

Tadpoles

For use in conjunction with the appropriate sized gobo holder, the Tadpole allows A, B and M size gobos to be correctly aligned with a lantern. Gobos can be aligned using the tail, which protrudes from the lantern and is designed to stay cool to the touch. The final position can be secured firmly using an etched clip.

Gobos for Moving Lights

Rosco will make every effort to produce any Rosco gobo design for any automated luminaire you specify. The limiting factors are size and information. Our technical team is in communication with all major manufacturers of moving lights and we try to maintain a complete, up-to-date database of the most current fixtures in order to have all of the technical information required to produce a successful gobo. In rare cases, you may request a gobo for a luminaire not in our database and for which we have no sizing information. Work with us to get it and we will be happy to make your gobo and meet your deadline!

Temperature, Durability, and Maintenance

Stainless Steel Gobos

Steel gobos can withstand the heat from virtually any modern luminaire, at least for a short while. In luminaires under 1200 watts, a steel gobo can be expected to last for months or longer with typical theatre usage. It is common for the gobo to discolour and possibly warp due to the intense heat but the integrity of the design will remain intact. In some designs with extremely fine line details, excessive heat may damage these fragile elements prematurely. When used in luminaires over 1200 watts, the lifespan will be reduced to some extent, depending on the heat and focus of the lamp.

Effects Glass Gobos

Colorizers are made using high temperature fused silica glass that can withstand the high temperatures from lamps up to 2500 watts. The colour and patterning will not be affected by typical use in common fixtures and you can expect them to last for years unless dropped or physically damaged.

Image Glass, Prismatics and ColorWaves are suitable for long term use in fixtures under 600 watts, or for intermittent use in fixtures up to 1200 watts or less. In these higher wattage luminaires, sustained excessive temperatures may result in cracking, delamination of the Prismatics' chips or peeling of the dichroic coating.

Glass Gobos

Black and White Glass Gobos are made on high temperature borosilicate glass coated with Rosco's unique Ultra-Matte™ aluminum coating. These Ultra-Matte B/W gobos are designed for use with high wattage lamps up to 1200 watts. For maximum performance gobos should be installed with the coated (dull) side away from the light source. This will preserve longevity and reduce internal reflections.

Colour Glass Spectrumgobos by Rosco have tremendous heat resistance due to the dichroic layers used in the manufacturing process. These gobos can withstand heat in luminaires up to 1200 watts or more and do not degrade under the heat. In extreme environments, cracking or delamination may occur. Used properly, a Rosco Glass Spectrumgobo can be expected to last for years with no apparent wear.

In all cases, a properly adjusted lamp focus that reduces hot spots and creates an even field of light will increase the lifespan of your gobos!

THE PROCESS

Your first port of call will be one of our Customer Services Consultants. They have an exclusive phone number and email address so that you can be sure of reaching them as quickly as possible.

It is very important to us that you are assured that your order is being dealt with and that you have confidence in the process. Therefore we will contact you within 2 hours of receiving your email, phone call or fax with a rough price and order acknowledgement or to discuss your order in more detail. Your customer services consultant will also discuss the exact nature of your artwork and any technical difficulties they can foresee.

Artwork supplied should always be the best available to ensure the most accurate end result. On custom metal gobos 'tagging' is necessary to prevent 'island areas' of metal dropping away so if you have a preference for where tags should be positioned, this should be indicated on a sketch accompanying the original artwork. Otherwise our graphic artists will place tags as discreetly as possible to maintain the integrity of the design. Time spent working on your artwork in preparation for production is considered part of the service and rarely incurs any additional cost.

Your image can be sent to Rosco in a variety of forms, although the most common is via email to customgobo@rosco-europe.com. Artwork is processed the day it is received in readiness for etching. These artworks are subsequently kept on file to enable you to re-order as quickly and efficiently as possible.

ARTWORK & TURNAROUND TIMES

Custom Metal Gobos

If you have "gobo ready" artwork and confirm your order by 11:00am we will ship same day. Orders requiring the intervention of our graphics department or confirmed after 11:00am will ship next day.

Custom Glass Gobos

Black & White - Subject to artwork... orders confirmed by 12:00 mid-day, will ship same day. Orders received after mid-day or requiring graphic intervention will ship next day.

Colour - The manufacture of colour gobos is a more complex procedure so a little more time is required. Orders received before mid-day will ship next day, Orders received after that will be shipped in two full working days.

Be aware, poor quality artwork may have a detrimental effect on our ability to honour these turn around times. Submitting quality artwork is the best way you can help us help you get your gobos in good time.

Missed the deadline?

If you require your gobos faster than our stated turnaround times. Speak to us. We can often manage a special production run to get late orders out same day. But this cannot be guaranteed.

CUSTOM GOBO SIZES

Rosco can provide you with any gobo size to fit most mainstream lanterns. In order to do this we require the following details when the order is placed: manufacturer and lantern type, and/or the overall diameter and image area of the gobo. If however you are unsure of the gobo size you require our customer services consultants will be happy to advise.

CMYK full colour gobo before assembly.

ORDERING A CUSTOM GOBO

Rosco is the world's largest manufacturer of gobos. It has a dedicated and knowledgeable Customer Service Team just for custom gobos. The sole mission of this team is to make the process of getting a custom gobo easy and error-proof. These steps will insure a successful outcome:

1. Email your artwork to: customgobo@rosco-europe.com

- The artwork can be in almost any form, but designs with very fine details should be no smaller than 75mm x 75mm (3" x 3") at 120dpcm (150dpi). Remember, a high quality image requires a high quality file to work with. You should consider using Adobe Illustrator for line art (eps or ai formats) and Adobe Photoshop for images that contain gradients or greyscale elements (psd or eps files). For high-quality, full-colour gobos, a good rule of thumb is to submit 1800pix x 1800pix files. Almost any file format such as jpg, psd, ai, tif, pct, or png is acceptable. Do not send WordArt or CAD files.
- If your digital file makes use of fonts, please convert to outlines.
- Scans of drawings or illustrations used for custom steel gobos can be faxed to +44 (0)20 8659 3153

2. Specify what you need and when

- Indicate the quantity and size gobo you need for each design you submit, as well as the lighting fixture(s) you will use to project them.
- If you will be using an uncommon fixture, please make sure to indicate size of the Outer Diameter of the gobo as well as the Image Area. You can always check our website for more information about your fixture. Or, contact our Customer Service Team and we'll assist you in tracking down the correct specifications.
- Indicate whether the gobo will be a front (most common) or rear projection.

Some Additional Tips

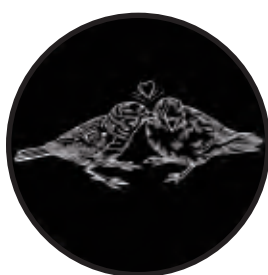

Steel Standards on Glass — Any Rosco steel gobo designs can be made on black & white glass and shipped to you in just 2 days! This is an ideal solution when using modern moving lights that cannot accept steel gobos.

Keystone and Distortion Correction — When hanging positions make it impossible to project your image without distortion, Rosco artists will assist in adjusting the artwork to compensate. Call for more information.

Rush Services — Sometimes there just isn't enough time in the production schedule. If your order won't make our published cut-off times, just ask. We'll always do whatever possible to make sure you get what you need, when you need it!

Proofs — Want to make sure the gobo we make is exactly as you need? Request that a proof of the gobo be sent to you before manufacturing. We'll gladly send you the tooling for you to approve. Just keep in mind that any delays in the approval process may delay delivery of your gobo. Proofs are not possible for same day rush or on colour glass rushes.

Colour Matching — While we always endeavour to match colours, as there are many variables outside our control (source, colour temperature, ambient light, projection surface etc.) we cannot guarantee colour fidelity. As a reference we match colours at Daylight (6000K).

Vortex 360 Dual Rotator™

The Vortex 360 Dual Rotator is one of the most versatile accessories ever offered to lighting designers. And its incredibly low price makes it possible for any theatre or venue to have several units available to cover any space or meet any need.

The sleek unit houses two carefully crafted gear drives, both made of stainless steel, to assure long term operation. A single silent motor drives both gear assemblies. Even at full speed, the Vortex 360 Dual Rotator is so quiet it can be used anywhere in a theatre or venue—including front-of-house positions in a theatre or grids on low ceilings in restaurants or stores.

No. 205 83000 0000 Vortex 360 Dual Rotator
No. 205 83100 0000 Vortex 360 Juliet

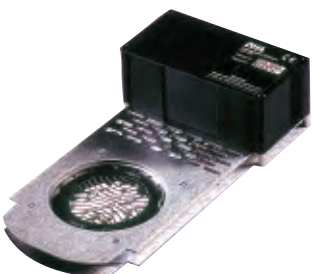

Indexing Rotator™

Rosco's Indexing Rotators are Double and Single Gobo Rotators which allow you to stop and start the gobo's rotation precisely, whenever and wherever you want. This is particularly useful for repetitive effects, such as the hands of a gobo clock, or for architectural effects, such as a shop display window. Rosco's Indexing Rotators are controlled through DMX512 and the DMX addressing facility is built into the unit. You control both the speed and direction of the rotation as well as the indexing position (up to 180 degrees available) and the amount of time the gobo stays in that position. A Power Supply Unit is necessary to get 24v DC to the Indexer(s).

No. 78IRTR003/V Single Indexing Gobo Rotator
No. 78IRTR203/V Double Indexing Gobo Rotator

Double Gobo Rotator™

Rosco's Double Gobo Rotator allows you to achieve kinetic and often spectacular lighting effects by rotating two gobos in the same or opposite directions, at the same or varying speeds.

The exceedingly quiet operation of this 1.1kg. unit allows it to be used in virtually any lighting position. This model provides forward and reverse rotation of each gobo in the same or opposite directions.

This rotator fits the ETC Source Four or the Altman Shakespeare or 1K. It requires a controller or MFX Control Adaptor.

No. 20RTR204/V Double Gobo Rotator —
DC Vari-Speed, 0-9 RPM

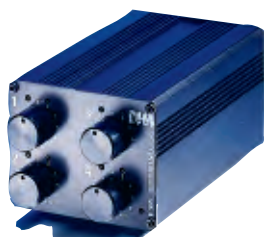

DMX/DC Controller

The Rosco DMX/DC Controller provides power and speed control for the Double Gobo Rotator or other variable speed effects. It is intended for remote control via a DMX512 signal. The output circuitry of Rosco's DMX/DC Controller is identical to that of its four channel Variable Speed Controller. Speed, range, bi-directional drive, load compensation and output protection are all maintained. The advantage is in accuracy and repeatability as well as the convenience of the DMX system. Effects can be programmed with other lighting directly into a cue sequence on a suitable lighting console.

No. 78CON/DMX DMX/DC Controller

Variable Speed Controller

This four channel Variable Speed Controller is designed to provide power, direction and speed control for Variable Speed Motion Effects units on four independent channels. Output connections are made via four conductor cables terminating in two 4-pin XLR connectors.

No. 78DCON Four Channel Controller

iPro Image Projector™

Rosco's iPro Image Projector offers users an easy, inexpensive solution for projecting photographic quality images in a theatrical or event environment. The iPro Projector is a precisely engineered accessory which fits the iris slots of most modern spotlights. It hosts iPro slides, which can be prepared from virtually any electronic art work.

There are three ways, all low cost, for preparing the iPro slides you will need. First, you can order one or more from Rosco's iPro slide library. The library is available for perusal on the Rosco web site. Or you can create the artwork on your own computer using Adobe Photoshop or similar software. Send the artwork to Rosco and a finished assembled iPro slide will be on its way back to you within 24 hours. The third method, for the unapologetic

do-it-yourself technician, is to use your own transparency film and your own printer to create the image and a Rosco One Time Slide Kit to assemble the finished iPro slide.

The iPro Image Projector fits as an accessory into the iris slot of, among others, an ETC Source Four, Altman Shakespeare, Strand SL or Selecon Pacific spotlight. Fitted with an iPro slide, the system will deliver bright, visible full colour images that will last between 15 and 50 hours.

No. 265 25100 0240

Custom iPro Slide projected on a auditorium wall.

Custom slide

Library slide

Both slides — same price!

X24 X-Effects Projector™

The X-Effects Projector provides large scale, 3-D effects previously unavailable to lighting designers. The device utilizes a 200-watt Enhanced Metal Arc source, whose short arc allows for an output of 5000 lumens, and a 7000 hour lamp life. The colour temperature is similar to a Xenon source at 6000°K, but with nearly two times the luminous effectiveness (or efficacy). The projector is available in two configurations, DMX on board and analogue.

No. 205 37015 0120

X24 X-Effects Projector – DMX

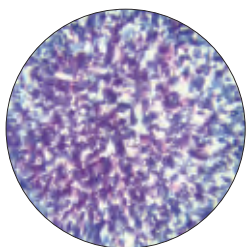

No. 205 37020 0120

X24 X-Effects Projector – Analogue

The designers at Focus Lighting found a brilliant solution to projecting rippling water on the ceiling of The Pier in Caesars Atlantic City. X-Effects Projectors gave them the effect they wanted. Photo by J. R. Krauza.

Animation Disk
No. 82511

Infinity™

The Infinity, Rosco's new gobo animation device, offers superb kinetic lighting effects combined with simplicity of use and low cost. The Infinity device affixes to the gel frame of virtually any spotlight. Affix one of the disks to the device, place a steel or glass gobo in the gate, plug the Infinity into an outlet or dimmer and watch magic appear on your stage or studio. The Infinity is equipped with onboard control of the Animation Disk speed and direction, as well as an on/off switch. It will fit the gel frame of luminaires such as Altman 1-K and any fixture with a 19.05cm gel frame. It is also supplied with an adaptor plate for Source-4 sized fixtures or any spotlight with a 16.51cm gel frame.

No. 205 82500 0000 Infinity

Supplied with an adapter plate and one Animation Disk.

Rosco's Infinity was affixed to two overlapping spotlights to generate this realistic rain effect. Both spotlights included a Water 1 gobo (no. 77833) in their gates. The Infinity in one unit was disk 82519, in the other disk 82511.

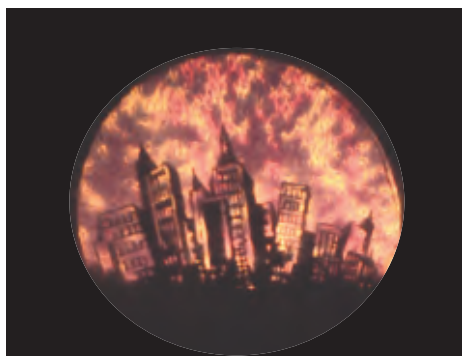

I-Cue Intelligent Mirror™

The Rosco I-Cue Intelligent Mirror is an ellipsoidal spotlight attachment that allows you to use your spotlight with much greater flexibility and control. The unit slides into the colour slot of the ETC Source 4, Altman Shakespeare, Strand SL, and Selecon Pacific. The major function of the unit is to reposition the beam of light so a single spotlight in a fixed position can be used for multiple specials in dozens of locations. With its onboard DMX, the unit is controlled directly from your lighting console giving you precise control of the mirror's pan and tilt motion.
