Firefly Lighting Quick Connect System makes light work of creating spectacular architectural lighting effects. Made stronger and robust for Australia's extreme weather conditions, the Firefly Lighting Quick Connect System is designed to provide you with greater creative flexibility while significantly reducing the time and labour required for installation. The Quick Connect System is only limited by your imagination, and is fully interchangeable with our Fairy Light Straight String and Icicle String ranges.

More than just simple Christmas lights, Firefly Lighting's Icicle Lighting provide a versatile alternative for creating stunning lighting effects. Firefly Lighting's Icicle Lights are ideal for wrapping large trees and structures, or creating a light canopy inside a marquee or shade structure. They're super easy to install too, saving you time and expensive labour costs. Our Icicle Lights also use our unique Quick Connect System that's fully interchangeable with our other Fairy Light ranges.

Firefly Lighting's Quick Connect System used across our Fairy Light and Icicle ranges allows you to easily connect additional strings of Fairy and Icicles lights in the same run within prescribed max run lengths.

Our simple plug n play system integrates polarity wiring and water proof connections into a easy to use scaleable solution.

CABLE COLOUR

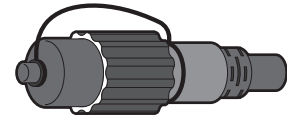

MALE CONNECTOR

2 prongs with positive and negative pre wired.

FEMALE CONNECTOR

Pushes into the male connector and screws tight to seal.

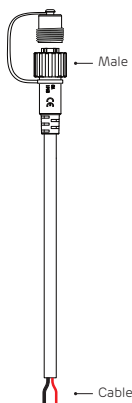

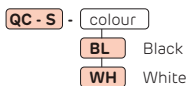

UNUSED CONNECTORS

Screw the end cap onto the end of the female connector to seal.

QC-S

Quick Connect Socket

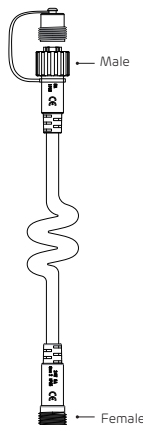

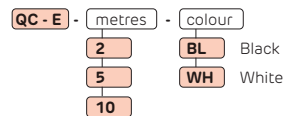

Connects the LED driver to the Firefly Quick Connect System.

QC-E

Quick Connect Extension Cable

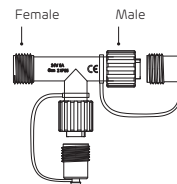

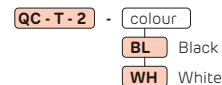

Available in 2m, 5m and 10m lengths.

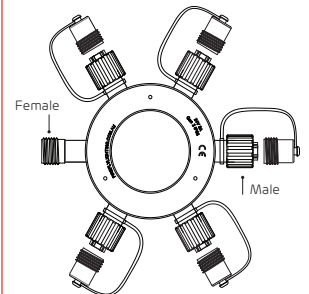

QC-T-2

Quick Connect Adapters

Connect up to 50m of Firefly Fairy Lights from each output. Max 50m length from output taking into account any extension cables and tail length from LED driver.

QC-T-5

QC-M

Quick Connect Multi Outlet cable

Connect up to 50m of Firefly Fairy Lights from each output. Max 50m length from output taking into account any extension cables and tail length from LED driver.
