

ABV1 – M290

Flexible Hinge Section (TRIO)

- Design suitable for overhead lifting as per DGUV 17 / BGV C1
- Stamped with WLL 1000kg and CE
- Hinges upwards and down wards
- Increased truss stability due to lower point of gravity by eccentric pick up point
- Adapts 3.2 ton shackle
- Truss "look" maintained

Technical specifications

Dimensions	Height, ex shackle	273 mm	10.75"
	Width	288 mm	11.34"
	Working length	600 mm	23.62"
	Max.angle upwards	76,5 dgr	
	Max. angle down wards	115,5 dgr	
Weight		7,2 kg	15,87 lbs
WLL		1000 kg (DGUV 17 / BGV C1)	2200 lbs
Material	Aluminium alloy EN AW 6082 T6		
Description	This hanging point is designed to be used with 290 Trio trusses. The suspension point is designed for overhead lifting. This unique solution allows lifting of long spans without the need of a 100% simultaneous lift. As the hanging point hinges, there is no shear and bending at the suspension point. The ideal solution for rigging long spans of truss by means of manual chain blocks. Version for M390 trusses available.
